Abstract

Paper-based portfolios are a standard for all tenure seeking faculty, however, they can be difficult to manage and maintain. There may be an easier way – electronic portfolios. This session will show what future e-portfolios might look like and the easiest way to transform that pile of documents into an easy-to-update electronic version.

Note: This paper was not available when the proceedings went to print. The author will provide handouts at the conference or via the web or email.
