### **Abstract**

In a world where anyone can have a website, it doesn't take a great deal of technical knowledge to build a simple website with interactive functionality. Drupal is one of the more popular Content Management Systems (CMS) out there. This session will cover a brief overview of what a CMS is, how a simple Drupal website can enhance your web presence, and how it can be used in an educational environment to facilitate discussion and social networking. Themes & modules relating to Drupal will also be discussed. Examples sites will be given (including the ASCUE website and its custom modules) and a list of helpful Drupal resource websites will also be provided.
