### Abstract:

This session was presented last year, but due to the popularity of the session, I thought it might be good to offer it again with a few new items. Drupal is one of the more popular Content Management Systems (CMS) out there. This session will cover a brief overview of what a CMS is, how a simple Drupal website can enhance your web presence, and how it can be used in an educational environment to facilitate discussion and social networking. Themes & modules relating to Drupal will also be discussed. Examples sites will be given (including the ASCUE website and its custom modules) and a list of helpful Drupal resource websites will also be provided.

### Presenter Bio:

Steve currently serves as the Web Coordinator for ASCUE and has been working with Drupal since 2007. He holds a Master's degree in Education and has taught as an adjunct professor at Philadelphia Biblical University. Steve also moonlights as a free lance web programmer and designer.
